

## Get more value out of current systems without disrupting processes.

- Fairmarkit integrates with Basware to enable seamless automated sourcing for goods and services using existing functionality.
- Fairmarkit's automated RFx process maximizes buyer efficiency while integrating with your existing workflows and approval processes. Setup is fast, easy and simple.

### Automated quoting:

"Get Quotes" as punch-out

Automated RFQ

Complete Order Request through check-out

### Second-Look Sourcing

"In Approval" Order Requests

Automated RFQ

Update OR with new supplier and price

## Integration Points

### SUPPLIER MASTER DATA

Fairmarkit uses an export of Basware's Supplier data to facilitate quoting with your preferred and registered suppliers, so we always source from your preferred suppliers first.

### QUOTING SELF-SERVICE

Shoppers can request quotes using Fairmarkit's easy UI and "check out" using the familiar punch-out catalog experience.

### SECOND-LOOK SOURCING

Fairmarkit interrupts the requisition approval process within a particular approval authority, based on commodity, amount or department Basware's native Spend Manager reporting. These requisitions are automatically sourced to validate and improve pricing, then the requisition is updated using batch processing.

**Get more value out of current systems without disrupting processes.**

- Fairmarkit integrates with Coupa to enable seamless automated sourcing for goods and services.
- Fairmarkit’s automated RFx process maximizes buyer efficiency while integrating with your existing Coupa workflows and approval processes. Setup uses Coupa’s APIs for **fast, seamless and easy integration.**

**Automated quoting:****Second-Look Sourcing****Integration Points****SUPPLIER MASTER DATA**

Fairmarkit uses Coupa’s active suppliers to facilitate quoting with your preferred and registered suppliers, so Fairmarkit always source from your preferred suppliers first.

**QUOTING SELF-SERVICE**

Users can request quotes using Fairmarkit’s easy UI and “check out” using the familiar punch-out catalog experience.

**SECOND-LOOK SOURCING**

Fairmarkit interrupts the requisition approval process within a particular approval authority, based on commodity, amount or department. These requisitions are automatically sourced to validate and improve pricing, then the requisition is updated using batch processing.

**Get more value out of current systems without disrupting processes.**

- Fairmarkit integrates with JDE to enable seamless automated sourcing of goods and services.
- Fairmarkit’s automated RFx process maximizes buyer efficiency while integrating with your existing JDE workflows and approval processes. Setup is fast, easy and simple.

**Automated quoting:**

**Second Sourcing - make sure requisitions have the best price:**

**Integration Points**

**SUPPLIER MASTER DATA**

Fairmarkit uses an export of JDE’s Supplier Master and Address Book to facilitate quoting with your preferred and registered suppliers, so Fairmarkit always source from your preferred suppliers first.

**QUOTING SELF-SERVICE**

Users can request quotes using Fairmarkit’s easy UI and “check out” using the familiar punch-out catalog experience.

**SECOND-LOOK SOURCING**

Fairmarkit interrupts the requisition approval process within a particular approval authority, based on commodity, amount or department. These requisitions are automatically sourced to validate and improve pricing, then the requisition is updated using batch processing.

**Get more value out of current systems without disrupting processes.**

- Fairmarkit integrates with Microsoft Dynamics 365 to enable seamless automated sourcing of goods and services using native functionality.
- Fairmarkit’s automated RFX process maximizes buyer efficiency while integrating with your existing Microsoft Dynamics 365 workflows and approval processes. **Setup is fast, easy and simple.**

**Simple flat file integration**

**API integration: Requisition sourcing**

**Integration Points**

**VENDOR DATA**

Fairmarkit queries Microsoft’s Vendor data to facilitate quoting with your preferred and registered vendors, so we always source from your preferred vendors first.

**QUOTING SELF-SERVICE**

Users can request quotes using Fairmarkit’s easy UI. Fairmarkit then creates either purchase orders or purchase (depending on your configurations) via API or batch processing.

**SECOND-LOOK SOURCING**

Fairmarkit uses Dynamics’ Purchase Requisition Line Review Workflow to send certain reqs for automated sourcing. These requisitions are automatically sourced to validate and improve pricing, then the requisition is updated with the new vendor and new price.

**PURCHASE AGREEMENT PRICE REFRESHES**

Fairmarkit uses data from your expiring Purchase Agreements to create RFQs or RFIs for expiring contract items. You can collect refreshed pricing from your incumbent vendor, and also test the market to ensure your incumbent is competitive.

**Get more value out of current systems without disrupting processes.**

- Fairmarkit integrates with Peoplesoft 8.9-9.2 to enable seamless automated sourcing of goods and services.
- Fairmarkit’s automated RFX process maximizes buyer efficiency while integrating with your existing Peoplesoft workflows and approval processes. **Setup is fast, easy and simple.**

**For Direct Spend:**

**For Contracted Items:**

**For Indirect Spend/Unplanned Orders**

**Integration Points**

**VENDOR MASTER DATA**

Fairmarkit uses an export of Peoplesoft’s Supplier Master data to facilitate quoting with your preferred and registered suppliers, so we source from your preferred suppliers first.

**CONTRACT PRICING REFRESHES**

Fairmarkit uses data from your expiring contracts to create RFQs or RFIs for expiring contract items. You can collect refreshed pricing from your incumbent supplier, and also test the market to ensure your incumbent is competitive.

**SECOND-LOOK SOURCING**

Fairmarkit interrupts the requisition approval process within a particular approval authority, based on commodity, amount or department. These requisitions are automatically sourced to validate and improve pricing, then the requisition is updated using batch processing.

**AUTOMATED RFQS**

If you own Peoplesoft’s RFQ module, Fairmarkit can automate the RFQ process completely, from vendor selection to response and award.

**Get more value out of current systems without disrupting processes.**

- Fairmarkit integrates with SAP MM, SRM, Hana and R4 to enable seamless automated sourcing of goods and services.
- Fairmarkit’s automated RFx process maximizes buyer efficiency while integrating with your existing SAP workflows and approval processes. **Setup is fast, easy and simple.**

**For Direct Spend:**

**For Contracted Items:**

**For Indirect Spend/Unplanned Orders**

**Integration Points**

**VENDOR MASTER DATA**

Fairmarkit uses an export of SAP’s Vendor Master data to facilitate quoting with your preferred and registered suppliers, so we source from your preferred suppliers first.

**CONTRACT PRICING REFRESHES**

Fairmarkit uses data from your expiring contracts to create RFQs or RFIs for expiring contract items. You can collect refreshed pricing from your incumbent supplier, and also test the market to ensure your incumbent is competitive.

**DIRECT MATERIALS SOURCING**

Fairmarkit uses data from your SAP Planned Orders and Bills of Material to automate RFQs for items and services you anticipate purchasing. The quotes can then be used to create requisitions, or you can update your material master to reflect the new pricing.

**SECOND-LOOK SOURCING**

Fairmarkit can interrupt the requisition approval process within a particular approval authority, based on commodity, amount or department. These requisitions are automatically sourced to validate and improve pricing, then the requisition is updated using batch processing.

**Get more value out of current systems without disrupting processes.**

- Fairmarkit integrates with Ariba to enable seamless automated sourcing of goods and services using native functionality.
- Fairmarkit’s automated RFX process maximizes buyer efficiency while integrating with your existing Ariba workflows and approval processes.  
**Setup is fast, easy and simple.**

**Interrupt requisitions to ensure you’re getting the best price**

**Facilitate faster, easier quoting**

**Integration Points**

**SUPPLIER API**

Fairmarkit syncs with SLP and SIPM to facilitate quoting with your preferred and registered suppliers, pulling contact information and other supplier metadata automatically.

**GUIDED BUYING**

Customize a tile to “create a quote” right from Guided Buying. Users who have been doing quoting offline or through email benefit from a simple, centralized way to collect quotations from your registered, trusted suppliers - and that data flowthrough to requisition.

**PURCHASE REQUISITION API**

Fairmarkit can automatically create RFQs by interrupting the purchase requisition – PO process using Ariba’s Operational Reporting API or by leveraging saved reports.

**BUYING & INVOICING**

We use Webservices/Cloud Integration Gateway to create and update requisitions with quote data, removing the need to key in purchase data. Quotations carry through to the PR and the PO.

**Get more value out of current systems without disrupting processes.**

- Fairmarkit integrates with Workday to enable seamless automated sourcing of goods and services.
- Fairmarkit’s automated RFx process maximizes buyer efficiency while integrating with your existing Workday workflows and approval processes. Setup is fast, easy and simple.

**Automated quoting:**

**Second Sourcing - make sure requisitions have the best price:**

**Integration Points**

**SUPPLIER MASTER DATA**

Fairmarkit uses an export of Workday’s Supplier Master and Address Book to facilitate quoting with your preferred and registered suppliers, so we source from your preferred suppliers first.

**REQUISITION SELF-SERVICE**

Users can request quotes using Fairmarkit’s easy UI. Fairmarkit automatically creates a requisition in Workday for the awarded quote.

**SECOND-LOOK SOURCING**

Fairmarkit can interrupt the requisition approval process within a particular approval authority, based on commodity, amount or department. These requisitions are automatically sourced to validate and improve pricing, then the requisition is updated using batch processing.

## Get more value out of current systems without disrupting processes.

- Fairmarkit integrates with Zycus to enable seamless automated sourcing of goods and services.
- Fairmarkit's automated RFx process maximizes buyer efficiency while integrating with your existing Zycus workflows and approval processes. Setup is fast, easy and simple.

### Automated quoting:

### Second Sourcing - make sure requisitions have the best price:

## Integration Points

### SUPPLIER MASTER DATA

Fairmarkit uses an export of Zycus' Supplier data to facilitate quoting with your preferred and registered suppliers, so we source from your preferred suppliers first.

### REQUISITION SELF-SERVICE

Requesters can request quotes using Fairmarkit's easy UI, as a punch-out from Zycus's Guided Procurement System (GPS). Once the quotes come back, the user "checks out" using the familiar Zycus Shopping Basket process.

### SECOND-LOOK SOURCING

Fairmarkit can interrupt the requisition approval process within a particular approval authority, based on commodity, amount or department. Fairmarkit can either query Sourcing Requests created by a buyer, or create them automatically to document the new quotes.
